Professional Summary

Results-driven **Senior .NET Software Engineer** with **7+ years of experience** designing, developing, and deploying scalable enterprise applications using **C#, ASP.NET Core, ASP.NET 4.5**. Proven expertise in **event-driven architecture, microservices, CI/CD pipelines, REST APIs**, and **cloud solutions (Azure DevOps)**. Adept at performance optimization, mentoring junior developers, and collaborating with cross-functional teams. Seeking a challenging .NET Developer role in the Indian IT market to leverage full-stack and backend development capabilities.

Technical Skills

Programming Languages: C#, Java, Python, SQL, PL/SQL, VB.NET, VB6
Frameworks & Libraries: ASP.NET Core, ASP.NET 4.5, LINQ, Entitiy Framework
Web Technologies: JavaScript, Typescript, Angular, React, HTML5, CSS3, JSON, XML, REST API
Databases: SQL Server, MS Access
Message Brokers: RabbitMQ
Cloud & DevOps: Azure DevOps, Docker, Kubernetes, CI/CD Pipelines
Testing Tools: xUnit, NUnit, Moq, Postman, BeeCeptor
Monitoring & Alerting: Kibana
Analytics & Logging: Amplitude, Segment, LogRocket, PostHog
Version Control: Git, GitHub, Visual Source Safe
Project Management: JIRA, Confluence, Coda
AI Developer Tools: Claude Code, GitHub Copilot, ChatGPT

Professional Experience

.Net Developer **October 2023 – June 2026**
Ria Money Transfer

- Designed and implemented **event-driven microservices architecture** using **RabbitMQ** message broker, improving system decoupling and scalability.
- Implemented different design patterns and improved endpoint performance, reliability, and security using **Circuit Breaker pattern** and **Rate Limiter** .
- Built and maintained **Azure DevOps CI/CD pipelines** for automated build, test, and deployment workflows.
- Developed and maintained **unit, integration test** using **xUnit, NUnit, Moq** ensuring high code quality and test coverage using **claude code and github copilot** and increased the output. And perform stress test to check the api endurace in real-time and find out memory leaks
- Applied **multi-threading, caching strategies**, and **application performance monitoring** to improve system throughput.
- Conducted **code reviews, technical discussions**, and **mentored junior developers**, contributing to a **60% improvement** in team workflows and delivery efficiency.
- Collaborated with cross-functional teams including product managers, QA engineers, and DevOps to ensure seamless project delivery.

Software Engineer **August 2021 – March 2023**
E-Zest Solutions Inc

- Designed and developed a **.net Worker Service** for developing go live daily reports and process the claims file and shoot an email to the client if there is any problem during the process.
- Built **Python and Shell scripts** to automate **ETL (Extract, Transform, Load)** processes for migrating XML data from servers to SQL databases, reducing manual effort significantly.
- Developed new forms in **Csharp and ASP.Net MVC** and support design request and provide clients with the weekly reports of all the medicines records that needs to updated to gain their business needs.

Product Engineer **July 2017 – June 2018**
Service Lee Technologies Pvt. Ltd.

- Developed application modules in **C#, VB.NET, and ASP.NET** to consume and integrate third-party APIs for business-specific requirements.
- Designed **web pages, business logic layers, and data access layers** using **ASP.NET with C# and LINQ**.
- Wrote optimized **SQL scripts** to automate complete database cleanup using a single query, improving data management efficiency.
- Applied **code optimization techniques** that increased page execution speed by **40%**.

Junior Developer **March 2016 – July 2017**
21st Century Informatics Pvt. Ltd.

- Developed **10+ interface applications** in **C# Windows Forms** to integrate multiple medical devices, eliminating manual data entry for clients.
- Built a **remote printing module** integrating **TSPlus** and **Windows DLLs**, enabling clients to download reports from any networked PC/laptop.
- Designed and implemented **statistical Graph UI reports** (Bar Charts, Pie Charts) to provide actionable business insights.
- Participated in the full **Software Development Life Cycle (SDLC)**: requirements gathering, analysis, design, and development.

Projects

DotNetTimeCode | *C#, GitHub* **September 2022 – October 2022**

- Contributed to an **open-source class library** for working with **SMPTE Time Codes** (SMPTE 12M specification) used in Motion Picture and Television Engineering.
- Extended existing library classes with **new functionalities in C#** and authored technical documentation for all project changes on GitHub.

Version Control System | *Node.js, HTML, CSS, JavaScript, GitHub* **August 2019 – December 2019**

- Built a **basic GitHub clone** supporting versioning features: check-in, check-out, merge-in, merge-out, manifest file management, project hierarchy, and version labeling.

H1B Application Analyzer | *Python, NumPy, Pandas, Scikit-learn, GitHub* **March 2019 – May 2019**

- Developed an ML-powered application that processes uploaded H1B application datasets and predicts application status using trained **machine learning models**.
- Achieved **80% training and testing accuracy** using Scikit-learn classification models.

Education

Master of Science – Information Studies **June 2023 – December 2025**
Trine University, Phoenix, USA *GPA: 4.0/4.0*

Master of Science – Computer Science **August 2019 – May 2021**
California State University, Long Beach, USA *GPA: 3.7/4.0*

Bachelor of Engineering – Information Technology **June 2011 – July 2015**
University of Mumbai, India

Certifications

Data Science Masters Course | *GreyAtom Pvt. Tech Ltd – Python, Machine Learning, GitHub* **January 2019 – June 2019**

- Completed multiple ML mini-projects; secured **8th rank out of 25 teams** in a competitive hackathon.

.NET Smart Pro | *Aptech Pvt. Tech Ltd*

- Completed **.NET Certification** with a **95% score in practicals**.
