Hitesh Sudhirchandra Bhavsar

+1 (562)-391-6585 |hiteshbhavsar0001@gmail.com|Portfolio|LinkedIn|GitHub

Technical Skills

Programming Languages: Java, C#,Python, SQL, PL/SQL
Web Technologies: JavaScript, React, HTML, CSS, JSON, XML, REST API
Frameworks & Libraries: ASP.Net 4.5, ASP.Net core, Spring Boot
Data Storage : Oracle, MySQL, SQL Server, RabbitMQ, Kafka
Cloud solutions: Azure DevOps
Monitoring & Alerting: Kibana, Grafana, Prometheus
Miscellaneous: Git, Github, BeeCeptor, Postman, Docker, Kubernetes, JIRA, Confluence, Visual Source Safe, coda, Amplitude, Segment, LogRocket, Posthog, hoppscotch

Professional Experience

Software Engineer • Ria Money Transfer **Oct 23 - Present**

- Experience implementing event-driven architecture using message brokers RabbitMQ.
- Strong knowledge of multi-threading, concurrency handling, caching strategies, and application performance monitoring
- Implemented circuit breaker pattern and rate limiter algorithm to improve the performance of the endpoint and making it secure
- Worked on Azure DevOps and made pipelines for CI/CD for the new project
- Experience leading technical discussions, mentoring junior developers, conducting code reviews, and collaborating with cross-functional teams
- Participated in the code reviews and optimizations and improved the workflows by 60%
- Proficient in building automated unit, integration, and performance tests using xUnit, NUnit, Moq, and Postman.

Software Engineer • E-Zest Solutions Inc **Aug 21 - Mar 23**

- Designed and developed code to compare different plans through xml files and displaying the difference in the xmls in a tabular format using Spring Boot REST API.
- Developed python and shell scripts to automate the process of extraction transformation and load (ETL) the xml files from the server to the SQL Database.
- Developed new forms in vb6 and MS Access and support design request and provide clients with the weekly reports of all the medicines records that needs to updated to gain their business needs.

Product Engineer • Service Lee Technologies Pvt Ltd **Jul 17 - Jun 18**

- Development of Modules included in C#, vb.net & ASP.Net to consume the existing third party API to suit the intended purpose.
- Developed SQL scripts to clean the complete database using a single query.
- Deployed and applied code optimization techniques and increased the speed of execution of page by 40%.
- Design and development of Web pages, business logic and data layers in ASP.Net with C#,LINQ.

Junior Developer • 21st Century Informatics Pvt Ltd **Mar 16 - Jul 17**

- Developed 10+ interface applications to interface multiple medical equipments which reduces the hectic work of manual entry for the client using c# and windows form application.
- Developed a module whose code integrates TSPlus application and Windows dll's to support a remote printing functionality through which the clients were able to download reports from any pc/laptop connected to the same network.
- Developed Graph UI, reports (Bar charts, Pie charts) to provide statistical information.
- Used ADO.NET in the Entity Framework to access modifies and deletes data in the SQL Server.
- Involved in various phases of the development life cycle by gathering requirements, analysing, design and development

Education

MS in Information Studies • Trine University, Pheonix • USA GPA: 4.0/4.0 **June 23- Dec 25**
MS in Computer Science • California State University, Long Beach • USA GPA: 3.7/4.0 **Aug 19 - May 21**
B.E in Information Technology • University of Mumbai • India **June 11 - July 15**

Projects

DotNetTimeCode (C#,GitHub) **Sept 22 -Oct 22**

- Contributed to open source project which is a class library for working with SMPTE Time codes defined by the Society of Motion Picture and Television Engineers in the SMPTE 12M specification.
- Added new functionality to the classes of existing library of Dot Net time code using C# and documentation for the project changes on GitHub.

Word Search Puzzle (Spring Boot, HTML, JS, CSS) **Nov 21 -Dec 21**

- Designed and implemented a word-search game where by inputting the grid-size and the words a new grid is generated with the words hidden inside the grid.

Version Control System (Nodejs, HTML, CSS, JavaScript, GitHub) **Aug 19 - Dec 19**

- A basic clone of GitHub service which is used to store different versions of a project.
- Includes features like check-in, check-out, merge-in, merge-out, maintain manifest file for each version of each file, maintain project hierarchy, listing labels to identify different versions.

H1B Application Analyzer (Python, numpy, pandas, GitHub, scikit-learn) **Mar 19 -May 19**

- Designed and implemented an application in which user uploads the data regarding the applications to be processed and with the help of the machine learning models the accurate status is set for the data.
- The testing and training accuracy is 80%.

Certification

Data Science Masters Course • GreyAtom Pvt Tech Ltd (Python, GitHub) **Jan 19 - Jun 19**

- Implemented multiple mini projects to understand the underlying concepts of the machine learning.
- Participated in a hackathon and scored 8th rank in 25 groups.

.Net Smart Pro • Aptech Pvt Tech Ltd

- Completed .Net Certification with 95% in the practicals.
